IP camera tester

User Manual

(V01.00)

- Thank you for purchasing the IP camera tester. Please read the manual before using the IP camera tester and use properly.
- For using the IP camera tester safely, please first read the [Safety Information] carefully in the manual.
- The manual should be kept well in case of reference.
- Keep the S/N label for after-sale service within warranty period. Product without S/N label will be charged for repair service.
- If there is any question or problem while using the IP camera tester, or damages occurred on the product, please contact our technical Department.

1 .Safety information

- The tester is intended to use in compliance with the local rules of the electrical usage and avoid to apply at the places which are inapplicable for the use of electrics such as hospital, gas station etc.
- To prevent the functional decline or failure, the product should not be sprinkled or damped.
- The exposed part of the tester should not be touched by the dust and liquid.
- During transportation and use, it is highly recommended to avoid the violent collision and vibration
 of the tester, lest damaging components and causing failure.
- ◆ Don't leave the tester alone while charging and recharging. If the battery is found severely hot, the tester should be powered off from the electric source at once. The tester should not be charged over 8 hours.
- Don't use the tester where the humidity is high. Once the tester is damp, power off immediately and move away other connected cables.
- The tester should not be used in the environment with the flammable gas.
- Do not disassemble the instrument since no component inside can be repaired by the user. If the disassembly is necessary indeed, please contact with the technician of our company.
- The instrument should not be used under the environment with strong electromagnetic interference.
- Don't touch the tester with wet hands or waterish things.
- Don't use the detergent to clean and the dry cloth is suggested to use. If the dirt is not easy to remove, the soft cloth with water or neutral detergent can be used. But the cloth should be tweaked sufficiently.

2. IP Camera Tester Introduction

2.1 General

The 3.5 inch IPS touch screen IP camera monitor is designed for maintenance and installation of IP cameras, analog cameras, TVI, CVI AHD cameras, as well as testing 4K H.264 /4k H.265 camera by mainstream, The 480x320 resolution enables it to display network HD cameras and analog cameras in high resolution. The unit supports many ONVIF PTZ and analog PTZ control. The combination of touch screen and key buttons make the IP camera tester very user- friendly.

The tester is also a great tool for Ethernet network testing. It can test PoE power voltage, PING, and IP address searching. You can use the blue cable tracer to locate individual connected cables from a bundle of cables. Test LAN cable for proper connection termination. Other functions include providing testing IP and analog at the same time, DC 12V 1A power output and much more. Its portability, user-friendly design and many other functions make the IP tester an essential tool for all installers or technicians.

2.2 Packing list

Tester
 Adaptor DC12V 1A
 Network cable tester
 Polymer lithium ion battery (3.7V DC 3000mAh)
 BNC cable
 RS485 cable
 Output Power cable
 Audio cable
 Safety cord
 Tool bag
 Manual

2.3 Function interface

1 🖬	The charge indicator: it lights red while the battery is being charged. As the	
1		charging is complete, the indicator turns off automatically
2	ጭ	The RS485 data transmission indicator: it lights red while the data is being
2		transmitted
3	U	Press more than 2 seconds, turn on or off the device ,short press to turn on or off
5	° O	the menu display
4	(L)	Confirm key /zoom key
5	- ^	Return/Close : Return or cancel while setting parameters of the menu, close or
	decrease the aperture	
6		Function switching key

9	DC12V1A power output, for provisional DC power supply
10	RS485 Interface: RS485communication for the PTZ
11	Audio input
12	Battery slot
13	Lan port
14	Micro SD card moveable (supports up to 32GB)

3. Operation

3.1 Installing the Battery

The tester has built-in lithium ion polymer rechargeable battery. The battery cable inside battery cabin should be disconnected for safety during transportation!

Prior to the use of the instrument, the battery cables inside the battery cabin should be well connected.

Pressing the key 🕑 continuously can power on or off the tester.

Notice:Pls use the original adaptor and connected cable of the device!

When the battery icon is full or the charge indicator turns off automatically, indicate the battery charging is completed

Notice: When the Charge Indicator 🕩 turns off, the battery is approximately 90%

charged. The charging time can be extended for about 1 hour and the charging time within 12 hours will not damage the battery.

Notice :Press the key 🕑 several seconds to restore the default settings when the

instrument works abnormally.

Multi-meter: the red and black multi-meter pen must insert the corresponding port.

Warnings:Instrument communication port is not permitted access circuit voltage over 6V,

otherwise damage the tester.

3.2 Instrument connection

3.2.1 IP camera connection

Power an IP camera with an independent power supply, then connect the IP camera to the IPC tester's LAN port, if the link indicator of the tester's LAN port is green and the data indicator flickers, it means the IP camera and the IPC tester are communicating. If the two indicators don't flicker, check if the IP camera is powered on or the network cable is not functioning properly.

Note:1) If the IP camera requires PoE power, then connect the IP camera to the IP tester'sLAN port . The tester will supply PoE Power for the IP camera. Click on the icon labeled POE to turn the PoE Power off or on.

2) If use the tester's menu to turn off the tester's PoE power supply, the PoE switch and the power sourcing equipment are allowed to connect to the tester's PSE port, and the PoE power will be supplied to the IP camera by the tester's LAN port. On this condition, the tester cannot receive data from IP camera, but the computer connected to the PoE switch can receive the data via the the tester.

Warning: Poe switch or PSE power sourcing equipment only can be connected to tester "PSE

IN" port, otherwise will damage the tester.

3.2.2 Analog camera connection

(1) Connect the camera's video output to the IP tester's VIDEO IN. The image will display on the tester after pushing the PTZ icon

(2) CCTV IP Tester "VIDEO OUT" interface connect to the Video input of monitor and optical video

transmitter and receiver, the image display on the tester and monitor

(3) Connect the camera or the speed dome RS485 controller cable to the tester RS485 interface ,(Note positive and negative connection of the cable).

3.2.3 HD Coaxial camera connection

* CVI, TVI, AHD camera are classified as HD coaxial cameras. Hereby the following instruction of how to connect CVI camera to the tester is also applied to CVI, TVI and AHD camera.

(1) Connect the CVI camera's video output to the IP tester's "Video IN" interface, the image will display on the tester. The tester only come with CVI input interface. There is no CVI output interface.
 (2) Connect the CVI camera or the speed dome RS485 controller cable to the tester RS485 interface.

3.3.1 Lite mode

Lite mode: You can easy find corresponding apps

In Lite mode, Press the icon several seconds, can move the icon to other apps

 In lite mode, click the finger icon in the lower right corner to release lock icon, move icons and change function icons sequence.

Click SD card, install or remove SD card.

3.3.2 Drop-down Menu

Press and slide at right top right corner twice to open shortcut menu. The shortcut menu includes IP settings, CVBS, LAN, Brightness, settings etc.

CVBS: Click icon "CVBS "to enter, you can test IP and analog camera at the same time.

LAN: Display network port or WIFI connection real-time upload and download speeds and other network parameters.

Settings: Enter settings interface.

IP: Enter IP Settings interface.

3.3.3 Screen capture

long press the key "enter", can capture screen interface and save it in any time.

You can go file management to view "file management -sdcard- Pictures-Screenshots

3.3.4 TesterPlay

Mobile screen projection (Only for android version)

The meter creates WIFI hotspot, connect mobile phone to the tester's WIFI hotspot, or the tester and mobile phone connect to the same Wi-fi network. Tap icon " , then select "TesterPlay" app to enter, click "Start" button to generates two-dimensional code, Please use mobile phone scan it, then download and install the client software, you can view the screen real-time projection.

PC screen projection:

Install VLC player in the PC, turn on the VLC player "Media - Open Network Streaming", and input the RTSP address of on the top instrument two-dimensional code, click "play" to view the screen real-time projection.

3.3.5 Rapid video

Auto log in and display camera image. Detailed operation refer to ONVIF function

After exit ONVIF app, Click Refresh to search ip address.

3.3.6 IP discovery

Press IP discovery

,tester auto-scan the whole network segment IP, as well as

auto-modify the tester's IP to the same network segment with the scanned camera's IP.

Local IP: Tester's IP address, Tester can auto-modify the tester's IP to the same network segment with the scanned camera's IP

Discovery IP:Connected tester equipment's IP address. If the camera connected to the tester directly, tester will display the camera's IP address, if tester connects to Local Area Network, it displays the current IP address.

Temp IIP:After searching IP address, the modified tester's IP address will not be saved, if you do not select "Temp IP," the modified tester's IP address will auto-save after searching.
Start:PING function, Click "Start", can PING camera's IP
Rapid ONVIF: Rapid ONVIF Quick link
IPC TEST: IPC TEST Quick link

Applicability: Using IP discovery app ,you don't need to know the first two digits of camera's IP address , it can auto-scan the whole network segment IP, and auto-modify tester's IP address , greatly improved engineering efficiency .

3.3.7 Rapid ONVIF test

Rapid ONVIF can display 4K H.265/H.264 camera image by tester mainstream, one key to activate Hikvision camera

Press enter ONVIF function, the meter auto scan all ONVIF cameras in different network segments. It lists cameras name and IP address on the Left of screen. Tester can auto login camera and display camera image. Factory default use admin password to auto login, if you modified the password, then default use the modified password to login

If you select ONVIF Rapid mode, the meter automatically scan different network segments for ONVIF cameras. It lists the camera name and IP address on the Device List. Tester can auto login camera and display camera image.

Click the button "Refresh", tester will scan the ONVIF camera again. Click the newly displayed ONVIF camera on the "Device List". The tester will show the IP camera's relative information and settings.

Activate HIKVISION Camera: When connected unactivated HIKVISION Camera, tester can auto

recognized ,And prompt "The camera is not active, you need to activate it", click "OK" to start activate .

Enter a new password for the camera

When comes out "activate success" prompt, click login to display camera image.

Pop-up settings menu when click the "ONVIF setting "icon in the upper left corner

Across network segments scan: After open this function, enter "Setting"-"IP Settings"-"Advanced"to add other network segments IP, Rapid ONVIF function can across network segments to scan camera's IP.

Auto Login : After open this function, tester can auto login camera and display camera image (The login password is the same with last time, the first time using password is the default password "admin")

Video transmission protocol: UTP and TCP protocol

Open password cracker : Cracks password of cameras

View manual : Open Manual

Restore Defaults: Revert "Rapid ONVIF" to default settings

Confirm : Save the modified parameters

Click "MENU" icon to open camera setting.

While in the "Live video" menu, click "Video Menu" at the top right of the image to access the following tools: Snapshot, Record, Photo, Playback, PTZ and Settings

ONVIF PTZ control: Tap the image in the direction you want the PTZ camera to move. Tap the left

side of the image to move left, right to go right, up to go up and down to go down. Compatible IP PTZ

cameras will rotate accordingly. PTZ rotation direction is displayed on top left corner of the image.

IP camera video settings: Click "Video Set" to enter the IP camera's encoder and resolution settings.

Make the desired changes and click "OK "to save.

Zoom in image :press the (+) key to enter the zoom mode. Press it again to exit zoom mode. When

the image is enlarged tap left, right, up or down on the image to move the whole image on the screen

If it is network video input to the tester, as the tester supports resolution up to 1080p, the input image will be very clear after it is enlarged. This is greatly helpful for the installers to ensure the IP camera's video coverage and decide the IP camera's install site.

Image can only be enlarged on SD mode (The icon "ONVIF" is SD mode.)

Select relative function on the bottom Toolbar to operate, "Snapshot", "Record", "Photos ",

"Video playback", "Storage set", "PTZ control" etc.

Snapshot:Click bottom "snapshot" to screenshot the image and store it to SD card.

if select manual storage, appears dialog box "Input Name", user-defined the files name(by Chinese character, English letter, or digit) to save in SD card, if select "Auto-storage", the tester auto stores the files after snapshot.

Record: When you click bottom the "Record" icon, video starts recording. A red recording icon appears on the screen and begins to flash and a timer appears indicating the time elapsed for the video.

Click on the "Stop" icon to stop recording and save the video file to the SD card.

Playback: Click the "Playback" icon to view saved videos. Double click the video you want to play.

Click to return to the last menu

To rename or delete a photo, click and hold on the file until this screen appears:

🕑 Via	leo player	📒 🚅 🔒 6:46 AM 🔀

Icons description: the description of function icons on the bottom toolbar

3.3.8 IP camera test

Display image from the 4K H.265 camera by mainstream

Click icon to enter IP camera test

Note: Currently, the IPC Test App only supports some brands' specific IP cameras, these include specific models made by ACTI, AXIS, Dahua, Hikvision, Samsung, and many more. If the camera is not fully integrated, please use the ONVIF or RTSP apps.

IPC test interface

Local IP: This is the tester's IP address. Click "Edit" to enter "IP setting" and change the tester 's IP address settings

IP camera type : Click on the IP Camera type to select the Manufacturer and model number of the integrated IP camera

Manual:Click IP camera type, list Honeywell, Kodak, Tiandy, Aipu-waton, ACTi, WoshiDA IP camera etc. If the brand has offered official original protocols, pls select camera type, input IP camera address ,user name and password ,click" official" to enter the camera image display interface(Currently, only support DAHUA official protocols)

Stream code: When test camera via RTSP, you can select mainstream or sub stream to test (if camera's RTSP have not been start or without, it will tip "auto match fail, please witch to manually selecting

IP Camera's IP: Enter the IP camera's IP address manually or click "Search" to auto-scan for the IP camera's IP address. It is better to directly connect the IP camera to the tester so the search results will only display the camera's IP address. If the tester is connected to a PoE switch, it will find and display several IP address

IPC User Name: Enter IP camera's user name

IPC Password: Enter IP camera's login password

IPC Port :: When you select the IP camera type, it will default the camera's port number and doesn't

need to be changed.

After all settings are completed, click "Enter" to view the live video

If IP address setting has error or IP camera is not connected.. The tester prompts "Network Error" Click **K** to quit from image display and return to IP camera test interface.

A Once you are viewing video on the IPC Test app, you will see the "Video Menu" icon on the top

right. This button will give you access to Snapshot, Record, Photo, Playback, PTZ, and Set. Please refer to the ONVIF section to use these functions.

3.3.9 Video monitor test

Analog camera test and PTZ control, click icon -

Display the input video image, click the top menu bar icon -(PEAK level, SYNC level, COLOR BURST measurement)

to enter video level meter,

Select relative function on the right side Toolbar to operate , functions including "Photos", "Snapshot" ,

"Record", "Playback", "PTZ", "Set",

Click the screen twice quickly, can be full zoom in on the touch screen.

(1) PTZ controller parameter setting

Select and click icon "PTZ", to enter PTZ setting:

CVBS				🗷 📋 8:2	7 AM 🔀
	Protocols:	1	Minking B01	\square	Photo
	Port:	1	RS485	\supset	
	Baud Rate:	1	2400	\supset	Snapsh
	Address:	0	1	\supset	Record
	Tilt speed:	\triangleleft	40	\triangleright	
	Tilt speed:		40	\triangleright	Playbac
	Set Position:	\triangleleft	8	\supset	÷
	Call Position:	\triangleleft	8	\supset	PTZ
	ОК		Canc	el	Set

A. Protocol

Use the up and down arrow keys to move the yellow cursor to the "protocol", set corresponding

Protocol and support more than thirty PTZ protocols. Such as

Pelco-D,Samsung,Yaan,LiLin,CSR600,Panasonic,Sony-EVI etc.

B. Port

Click and move, to "port" Select the communication port for the PTZ camera controlling (RS485)

C. Baud

Move the yellow cursor to "Baud", Select the baud rate according to baud rate of the PTZ camera.(150/300/600/1200/2400/4800/9600/19200/57600/115200)

D. Address

Set the ID according the ID of PTZ camera (0~254), the setting address data must be consistent the speed dome address.

E. Pan speed: Set the pan speed of PTZ camera (0~63)

F. Tilt speed: Set the tilt speed of PTZ camera (0~63)

G. Set preset position (Set PS)

Click and select "Set PS", set and save preset position number(1~128),

H. Call the preset position (Go ps)

Click and select "Set PS", set and save preset position number (1~128), click "sure" to save,

Call some special preset number, can call the dome camera menu

Check and set the protocols, address, interface and baud, all must be consistent with the dome camera,

then the IPC tester can test .After setting the parameter, the tester can control the PTZ and lens

To control PTZ by screen touch:

Tap left, right, upward and downward on the touch screen to control the PTZ rotation direction. By two fingers move outward and inward on the touch screen to zoom in and out the PTZ.

2) Video and storage setting

Click icon "set", to enter and set analog video image brightness , contrast, color saturation, as well as the

file storage way after snapshot and recording, support auto-storage and manual storage.

When select manual storage, user can name and store the files.

CVBS	8:28 AM 🔀
	Photo
Bright + 25	Snapsh
Contra + 40	
Satura	Record
Photo Storage: Auto	Playbac
Video Storage: Auto	PTZ
OK Restore Cancel	Set .

(3) 4 x zoom image display and Video out

When image input, press (+) to enter "zoom", press it again to quit.

Using the touch screen to control PTZ camera movement:

Tap left, right, upward or downward on the video image to move the PTZ camera in a desired direction.

Stretch two fingers outward or inward on the touch screen to zoom the image in or out.

For analog video input, as the resolution is 720*480, it is normal that the zoom in image is not

clear. But for network digital video input, as it supports resolution up to 480*320, the zoom in image is still very clear. This is very helpful for IP camera installation.

(4) Snapshot

Click the icon "Snapshot ", when the video in, to take a picture and save the current video frame in the SD card as JPEG file.

If the unit is set to the manual mode an "Input Name" pop up box will appear and you can enter a title

for the snapshot. If the unit is set up to automatically set file names, this box will not pop up.

(5) Video record

When you click the "Record" icon, video starts recording. A red recording icon appears on the screen and begins to flash and a timer appears indicating the time elapsed for the video. Click on the "Record" icon again to stop recording and save the video file to the SD card.

if select manual storage, before recording begins ,appears dialog box "Input Name" ,user-defined the files name(by Chinese character, English letter ,or digit) to store in SD card , tester will hereby store the files in SD card after recording . if select "Auto-storage ,tester will auto store the files in SD card after recording .

(6)Photo

Click the icon "photo" to enter, click the selected thumbnail photo to display it on the screen.

Double-tap the image you want to view to make it full screen. Double-click again the photo to return.

To rename or delete an image, click and hold on the file until this screen below appears.

(7) Recorded video playback

Click the "Playback" icon to view your recorded videos. Tap on the video file image you want to watch.

Video files also can play in the main menu "Video Player".

3.3.10 CVI camera test

HD CVI camera, CVI dome camera test and PTZ control, click icon to enter.

When HD CVI signal input, the tester will display the image resolution on the top bar. Double-taps on

the screen to make the image displayed full screen.

The tester supports resolution upto 8MP, 3840x2160P 12.5/15FPS,

1280x720P 25FPS / 1280x720P 30FPS / 1280x720P 50FPS / 1280x720P 60FPS

1920x1080P 25FPS / 1920x1080P 30FPS/2560x1440P 25FPS/2560x1440P 30FPS/

(1) PTZ control

1.1 Coaxial PTZ control

Click the icon"PTZ" on the right toolbar to do the corresponding setting.

"Port": select coaxial control

Enter PTZ address to perform parameters setting

Operation instructions, please refer to "3.3.9 PTZ (1) Video monitor test".

The PTZ address in the tester must be consistent with the dome camera or decoder, then the IPC tester can test .After setting the parameter, the tester can control the PTZ and lens.

To control PTZ by screen touch:

Tap left, right, upward and downward on the touch screen to control the PTZ rotation direction, PTZ cameras will rotate accordingly. By two fingers move outward and inward on the touch screen to zoom in and out the PTZ.

Set preset position:

Move the PTZ camera to the preset position, the Tap it and input preset position number. Tap "Set position" to complete set preset position.

Call preset position:

Tap the preset position area, input preset position number. Tap "call position" to complete call preset

position. CVI

1.2 RS485 control

Operation instructions, please refer to "3.3.9 PTZ (1) PTZ control parameters setting"

(2) Coaxial camera menu setting

Tap icon "UTC", select "menu setting" to enter the dome camera menu

key "Enter" or click the icon to call the dome camera menu.

(3) Snapshot, record, photo viewer and video play back, please refer to "3.3.9 PTZ (1) Video monitor

test". Tap "close menu" to close camera menu

(4) Save setting

Click icon "Set" on the right toolbar to enter storage setting.

Support auto-storage and manual storage.

When select manual storage, user can name and store the files.

3.3.11 TVI camera test

HD TVI camera, TVI dome camera test and PTZ control, Click icon to enter When HD TVI signal input, the tester will display the image resolution on the top bar. Double-taps on the screen to make the image displayed full screen.

The tester supports resolution as follows:

1280x720P 25FPS / 1280x720P30FPS / 1280x720P 50FPS / 1280x720P 60FPS

1920x1080P 25FPS / 1920x1080P 30FPS / 1920x1080P 50FPS / 1920x1080P 60FPS /2048x1536P 18FPS/2048x1536P 25FPS/2048x1536P 30FPS /2560x1440P 15 FPS/2560x1440P 25 FPS/2560x1440P 30 FPS/2688x1520P 15FPS/2592x1944P 12.5FPS/2592x1944P 20FPS/ 3840 x 2160P 12.5/15 FPS

Coaxial camera menu settings

Tap icon "UTC", select "menu setting" to enter the dome camera menu

Input calling dome camera menu address code, after finishing the parameter settings, you can press the

More operation instructions (such as PTZ control, coaxial camera menu setting ,snapshot, recording and playback etc), please refer to"3.3.10 CVI camera test"

3.3.12AHD camera test

۲ AHD camera, AHD dome camera test and PTZ control, Click icon

When AHD signal input, the tester will display the image resolution on the top bar. Double-taps on the

to enter

screen to make the image displayed full screen.

The tester supports resolution as follows:

1280x720P 25FPS / 1280x720P 30FPS / 1920x1080P 25FPS / 1920x1080P 30FPS/2048x1536P 18FPS/2048x1536P 25FPS/2048x1536P 30FPS /2560x1440P 15 FPS/2560x1440P 25 FPS/ 2560x1440P 30 FPS/2592x1944P 12.5FPS/2592x1944P 20FPS,3840x2160P 15FPS

(1) Coaxial PTZ control

UTC control: select "PTZ control or PTZ control-2" (AHD camera has two different order ,if select "PTZ" cannot control , pls go "PTZ-2")

If to coaxial PTZ control the AHD camera, no parameters setting is needed.

More operation instructions please refer to "3.3.10 CVI camera test"

3.3.13 Network tool

(1) PING Test

Connect a network cable to the LAN port and click the **PING** icon to open the PING tool. You can set your LOCAL (native) IP address, Remote IP address (e.g. IP camera), Packet count, Packet Size, Packet time and Timeout. Press "Start" to start pinging. If the IP camera or network device is not configured properly or not plugged in, it will say "Destination host unreachable," or have 100% packet loss. If the tester connects to the device, the send and receive packets will have a 0% packet loss.

Application: PING testing is the most conventional network debugging tools. It is used for testing if the connected IP camera or other network equipment's Ethernet port is working normally and the IP address is correct.

It's normal that the first data packet will be lost when test start.

(2) IP address scan

Connect the cable to the LAN port, click icon *Here* to enter, Set your IP address search range by changing the Start and End IP addresses. Click the "Start" button to scan the IP address range. You can also input an IP address in the Port Number Scan to scan for open ports.

💶 Netw	ork Tool	👸 로 🔒 5:46 PM 🔀
	Scan IP	Port Number Scan
PING DELINOIT	Start IP: 192.168.0.1	Please enter the IP address:

	192.168.0.23	
Network	192.168.0.26	
test	192.168.0.29	
	192.168.0.32	

(3) Network test (Ethernet bandwidth test)

Network test (Ethernet bandwidth test)

To use the Network tester, you will need two IP testers. One is used as a Server and the other as a Client. Both devices must be on the same network segment in order to communicate. Click the from icon to open the Network Tester app.

🖳 Netw	vork Tool	🐻 로 🗎 5:46 PM 🔀
PING	Service IP: 192.168.0.234	192.168.0.234
PING	Start Server	Start
SCAN		
Network		
test		

a).Start the server: Click "Start Server" button to use the tester as a Server. It will display its IP address at the top of the screen.

b). Start send packet test: Using the other IP tester, type in the Server's IP address at the top right corner of the screen. This app is used to send packets for network speed testing. Click the "Start" button to send the packets and start testing.

🖳 Netw	vork Tool	🐻 로 📄 5:49 PM 🔀
PING	Service IP: 192.168.0.234	192.168.0.238
PING	Start Server	Stop
SCAN		Client connecting to 192.168.0.238, TCP port 5001 TCP window size: 1.00 MByte (default) (4) local 192.168.0.234 port 59919 connected with 192.168.0.238 port 5001 [4] 0.0-1.0 sec 11.7 MBytes 98.4 Mbits/sec

Network bandwidth testing can also be tested with a computer using compatible network bandwidth testing software. Install network bandwidth testing software on a computer, as a test Client or Server, to do the mutual testing with the tester. If use computer as the server, the computer IP address is :192.168.0.39

Metwo	k Tester		
○ 中文	← English		
	((Server)

		Start Test	

Tester as Client, tester's IP address is:192.168.0.238. The Server and the Client are at the same network segment, but with different IP address. Input Server's IP address 192.168.0.39 in the tester and click "Start" to test network bandwidth.

Or use tester as a Server, computer as test Client (select Client, input tester's IP address to test)

Network	rk Tester			25
○ 中文	• English			
	C (Server)			
	Client)	Server IP	192 . 168 . 0	. 238
		Start Test		

When use tester as Server, shows results:

(4) Port Flashing

Connect a network cable to the meter's "LAN" port, click the icon

....

app. Click "Start". The IP tester sends a unique signal to make the connected LAN port of the switch

flash.

If the tester and PoE switch are connected well, the LAN port of POE switch flash at special frequency,

If not, no any changes on the LAN port

Application:

The tester will send special signals to make the connected LAN port flicker at special frequency, which will enable the installers to easily and quickly find the connected Ethernet cable. This function can prevent mistakenly insertion or disconnection non-corresponding cable to artificially interrupt network connection.

(5) DHCP server

Click on the DHCP icon to open the DHCP server app. Select the "Start" check box at the top and make any desired changes to the network settings. Click "Save" to start assigning dynamic IP addresses for IP cameras and other networked devices. Click the "Refresh" button to check your Client list.

(6) Trace route

It is used to determine path of the IP packet access target.

Note: Trace route testing results only for reference, for accurate test route tracking, Pls use professional

Ethernet tester.

Click store to enter trace route

Input tracking IP address or domain name in the Remote Host IP. Set maximum hop count, normally

default is 30

Click "start" to trace the goal address

(7) Link monitor

Click the ref icon to open the Link Monitor app. This app is used to see if an IP address is occupied by other network devices. This will avoid new address conflicts

Click "Add" and enter the desired IP address. To test different network segments, click the "Settings" icon on the main menu and go to IP Settings and make the desired changes. Once the desired IP addresses are added to the Link Monitor list, click "Start". If the IP address status shows a check mark the IP address is occupied. If the IP address status shows an X the IP address is available. Click "Stop" to stop the testing

Application:

Add an IP camera or other network device to the current network group, the new IP address must not be occupied, otherwise it will result IP conflicts and stop the equipment normal working. Link monitor can check if the new setting IP address is occupied.

3.3.14 Rapid IP Discovery

Connect the cable to tester's LAN port. Press

to enter Rapid IP Discovery app.

Click "Start "to search all IP address of connected equipments in whole network segment. Click "Stop "to stop work.

3.3.15 Audio Record

Connect an audio device to the IP tester's audio input port. Click the icon to enter the Audio

Recorder app. Click the red button to stop, and the unit will prompt you to save the recording

3.3.16 Data monitor

Pls click icon to enter

Click "Setting" to choose the baud rate of RS485; it must be the same as the DVR or the Control

keyboard .The DVR or Control keyboard send the code to the tester, if it can be read, the protocol will shown on the upper right, like Pelco D, if not, like P:---

While the tester receives the code, press the (\Box) key to empty.

Though the RS485 port, display the PTZ control code of the multifunctional keyboard or the DVR. Controller can check the status of the RS485 transmission through the code on the display. (The RS485 communication rate must be the same.)

Application: Check the RS485 communication states of the video optical transmitter whether normal. Engineer can analyze the protocol and check the data through the displayed code.

3.3.17 Audio player

Click the icon

to enter . The audio player only supports MP3 format Audio files.

3.3.18 Video Player

The Media player can browse video and image files. It supports the video formats of MP4, H.264, MPEG4, and MKV. The IP tester recorded files can play directly via the Media player. The Media player will automatically display the video files from the SD card. Click on the desired file to play. Click RETURN to exit.

To rename or delete an existing file, press the file name for a few seconds until the screen below appears. You can then rename or delete the file by pressing the desired option.

3.3.19 RTSP Player

The RTSP Player app will allow you to view the RTSP video stream from an IP camera. If you were unable to view your camera via the ONVIF or IPC Test apps, it is possible your camera will have an RTSP stream and you can view live video.

From the main menu, select the "APP Tool" folder and then select the "RTSP Player" to open the app. If the IP camera uses MJPEG, select the RTSP icon. If the IP camera uses H.264, select the "RTSP HD" icon.

Local IP: This is the IP testers IP address.

RTSP Add: This is where you can manually enter the IP camera's RTSP URL or click on Search to

search the network for cameras that use an RTSP stream.

IPC Username: Enter the IP camera's user name.

IPC Password: Enter the IP camera's password.

Once you have entered all the necessary information, select Enter at the bottom left to view the RTSP stream.

Note: in the event the ip tester does not auto detect the rtsp stream, refer to the specific camera manufacturer for the specific rtsp stream url. you may find this on line with a search of the camera model number and the word rtsp.

3.3.20 Hik test tool

Hik test tool app is design for activating and debugging Hikvision camera, can auto-identify unactivated hikvision camera, also can display image from the Hikvision camera.

Tap icon **HIK** to enter

 Hikvision activation: When connect the unactivated Hikvison camera to the tester, it will auto identify and display "Unactivate" at safety mode. Select needed activate the camera, click bottom right corner button "Enable", pop-up "the camera is not activate, activate now"?

2.Input password: Input new password, tap "ok" to activate

3. Confirm activation

After activating the camera, the program default modifies the camera IP. Activated multiple cameras in

the local area Network, and pop-up menu to modify IP, improve project efficiency.

Play: display image from the camera

Modify network information: Change the camera IP address, subnet mask and gateway etc.

Modify user information: Modify the camera's user name and password.

Factory Reset:Camera factory reset

3.3.21 Dahua test tool

Dahua test tool is developed for installation and debugging of the Dahua IP camera, it can display image, and modify IP, user name and password etc. Making Dahua camera test more convenient and quickly.

Modify user information: modify camera user name and password, which is onvif, Dahua test tool,

IPC TESTE user name and password, not web user name and password.

Factory reset setting: camera will be soft reset, and the device's user name, password and network set

be saved. Other settings information is factory reset.

Copy the downloaded update file to SD card "update" directory, if no directory, please create one.

Click the *icon* icon to open the Update menu. Select "Local Update" to update via the SD card or select "Online Update" to check for updates on the internet. If there are applications that need updating, the applications will be displayed on the

Online update: Connect the Internet to update the apps.

System update: Connect the Internet to update systems.

3.3.23 Office

Quick office app (support excel, word, ppt format) doc. editable

3.3.24 Browser

Click icon 🚺 to enter

Type in the camera's IP address and press "Go" to access the IP camera's interface.

NOTE: You will not be able to view live video in the web browser. For viewing video, use the IP

tester's live camera view Apps

The IP camera and IP tester be on the same network segment for the browser to interface with the camera. If they are not in the same segment, click the button or press "RETRUN" to exit. Open the "Settings" app from the main menu to change the IP tester's network settings to match those of the IP camera.

3.3.25 DroiNotes

.

Notepad can be used to record the important testing results, click the key "NEW NOTE" to save the contents. Notepad can auto record the storage date and time.

details. Press the record bar for several seconds, prompt whether delete it

3.3.26 System Setting

Click icon 👸 to enter

Language: Select your desired language: English, Chinese, Korean, Russian, Italian , Polish , Spanish,

French or Japanese

Typewriting: You can select typewriting or install other typewriting:

Date/Time: Set the Date/time of the IP tester

IP setting: Manually set the IP address, Subnet Mask, Default Gateway and DNS address or select "Dynamic allocation" to use DHCP.

WLAN Net: Turn WiFi off or on by pressing the "Open the wifi" button. Once WiFi is turned on, and

click connected WIFI, it will scan for wireless networks in your area.

Settings		🗐 🛜 📋 3	3:05 PM 🔀	Settings		📋 3:06 PM 🔀
Aanguage & inp	Wi-Fi hotspot	WIFI ON/OFF	1	Aa Language & ir	WLAN001	F 👥

It includes Music, Videos, Pictures, Documents, zip file etc. It is convenient to view and manage

FTP server

You can choose internal or external SD card.

Other operation details, Pls refer to FTP settings

3.3.28 Theme

Click Theme icon to enter themes setting.

Desktop style : you can select Lite mode or normal mode.

Theme:

Pressing square area's any color icon several seconds, the selected color icon will be auto move the rectangle area, if you press selected color several seconds, and it will be auto deleted

Theme colors include fixed order and random order, and click "set" to save

Color

When set background color, you can select colors from Color Phase, and also can input color's RGB to

set.

After finished color setting, click "set" to set it as desktop or application background.

Set as desktop background: Setting color as desktop background

Set as application background: Set color as application background Set at the same time: Setting color as desktop background and application background. Cancel: Cancel current setting.

Picture:

Click Picture to select one, and set as temporarily background to view setting effect. Click "more" to select pictures from local file, and click set to set picture as background.

Sliding effect:

Tester's sliding effect includes stereo effect, folding effect, Left and right folding, rotate effect, Ombre effect etc, selecting one of effect to view slide effect in the square area, and click "set" to save

3.4 Audio test

You can test the audio input from audio pickup devices by connecting the audio pickup device to the IP tester with the supplied audio cable.

3.7 DC12V 1A power output

When the IP tester is turned on, the DC 12V power output ON by default. The smaller end of the supplied converter cable connects to the tester's DC12V/1A OUTPUT and the other end connects to the camera's power input.

Application

Power output function is mainly used in the camera field demonstration and testing, meanwhile, for some camera installation sites, If there is no power outlet for the adapter to power the camera, the tester can offer temporary power for it. But we do not suggest tester supply power for a long time.

MNotice:

- a. Don't input any power into the "DC12/1A OUTPUT" port of the tester
- b. Man-made damage is not within our company's warranty
- c. The IP tester 's power output capacity is 1A. If the IP camera uses more than 1A, the tester will automatically enter a protection mode
- d. Disconnect all cables from the tester and reboot it to resume using the tester.

The IPC tester power output is close to 1A, if the IP camera's power is over 2V, the tester will auto enter protection mode. Disconnect all the connections of the tester and then connect the tester with power adaptor to resume the tester.

e. Make sure the tester has a sufficient charge otherwise the tester will not able to provide enough output power
